REPORT NO. 127
PAGE 1

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

NAVY DEPARTMENT
BUREAU OF MEDICINE AND SURGERY
DIVISION OF PREVENTIVE MEDICINE

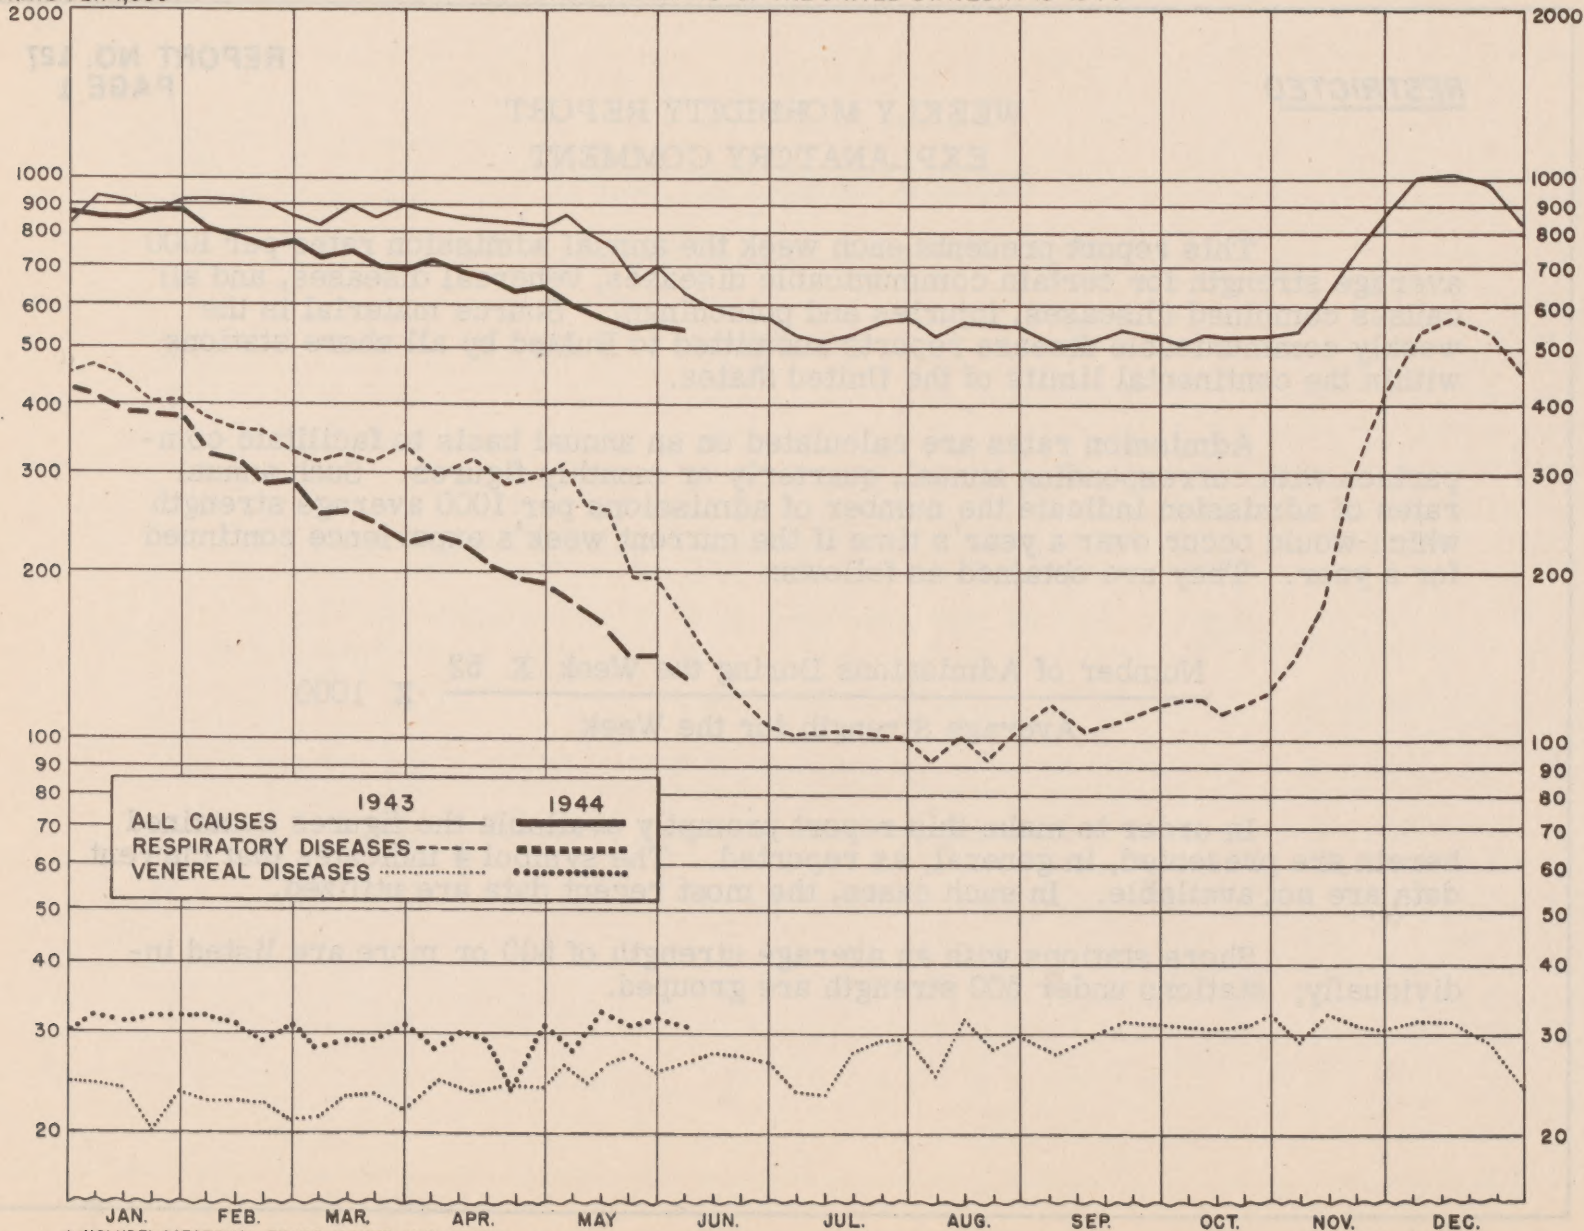

*INCLUDE: DATARIAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

RESTRICTED

FIGURE 1
ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES*, VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1943-1944

REPORT NO. 127
PAGE 2

RATE PER 1,000

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

CURRENT TRENDS

Week Ending 3 Jun 1944

The admission rate for All Causes dropped this week after a slight rise the week before. The 1944 curve continues well below the 1943 curve for the corresponding period. The highest rate (973) was reported for the Potomac and Severn River Commands, the lowest (394) for the 12th District.

The respiratory disease curve continued its downward course after a slight leveling off the previous week. The curve stands below the 1943 curve. The highest rate (217) was reported by the 13th District, the lowest (44) by the 6th District. The respiratory disease curve turned upward in the 4th, 8th, and 9th Districts.

The curve for the venereal diseases turned downward this week after a slight rise the previous week. The 1944 curve continues almost consistently above the 1943 curve. The 8th District reported the highest rate (46), the 7th and 11th Districts the lowest rate (23).

Influenza and Catarrhal Fever. The downward trend for these infections continued this week and the curve now stands at a point lower than was reached during any week of 1942 or 1943. The highest rate (148) was reported for the 3rd District, the lowest (26) for the 6th District.

Pneumonia--Broncho and Lobar. For the first time since the third week of August 1943, the rate for these infections dropped to 2. The 13th District reported the highest rate (5), the 7th District reported no cases.

Pneumonia, Atypical. The rate for atypical pneumonia for the third consecutive week was reported at 2. The 1944 curve continues to stand above the 1943 curve. The highest rate (10) was reported from the 11th District, the 4th and 13th Districts and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS--CONTD.

Tonsillitis and Pharyngitis, Acute. The rate for these infections dropped to the lowest point recorded since the week ending Jan. 1, 1944. The highest rate (77) was reported for the Potomac and Severn River Commands, the lowest (14) by the 6th District.

Rheumatic Fever, Acute. The rheumatic fever curve turned upward again this week, climbing back to the early April level. The 13th District reported by far the highest rate (20). No other District reported a rate over 6. The 4th District reported no cases.

Scarlet Fever. The scarlet fever curve, after a slight rise last week, dropped this week continuing the downward trend which began the last week of January 1944. An increase was noted in the 12th District only. The highest rate (27) was reported for the 13th District. No other District reported a rate over 7. The 4th, 6th, and 7th Districts and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this infection dropped this week. This low point of .19 was not equalled in a single week of 1943, and has been equalled only once before in 1944 (week ending April 29). Cases were reported from only three Naval Districts.

Malaria. The malaria rate continued at 2. For the past three weeks the 1944 curve has stood below the 1943 curve for the corresponding weeks. For the first twenty weeks of 1944 the malaria curve has stood consistently above the 1943 curve. The highest rate (4) was reported from the 1st District. The 4th and 7th Districts reported no cases.

Measles. After a slight leveling off the previous week the measles curve continued its downward trend. The 1944 curve has been very similar to the 1942 and 1943 curves. The 13th District reported the highest rate (12), the 6th District the lowest (.7).
